ELECTRICAL REQUIREMENTS

Your Hot Dog Roller Grill requires a 120 volt/60 cycle/15 amp outlet, and should be operated on a dedicated line. Make sure to have a qualified electrician supply the proper electrical requirements before plugging the machine into an outlet.

**DANGER**

Machine MUST be properly grounded to prevent electrical shock to personnel. Failure to do so could result in serious injury, or death. Do NOT immerse the kettle, warmer, or any other part of this equipment in water. Always unplug the equipment before cleaning or servicing. Do not use excessive water when cleaning.

OPERATING PROCEDURES

1. Place hot dogs on rollers. Turn heat to designated temperature. Left knob controls the heat for one set of five (5) rollers and the right controls the other set of five (5) rollers.
2. For low heat, set control(s) to LOW using one or both sets of rollers. For high capacity, set control(s) to MEDIUM or HIGH using both sets of rollers.

1. Unplug the power cord from the outlet.
2. Remove any remaining hot dogs from rollers.
3. Remove drip pans and clean thoroughly.
   - Use a mild detergent, soap and water, or soda-water to clean the roller grill.
   - Rinse after washing and dry thoroughly before using.
   - **DO NOT** use metal objects or abrasive cleaners on the coated rollers.
